

# **Health Care Coalitions (HCCs)**

Locally Driven. Health Care Prepared.

# WHAT IS AN HCC?

An HCC is a **network of individual public and private organizations in a defined state or sub-state geographic area** that partner to prepare health care systems to respond to emergencies and disasters, ultimately increasing local and regional resilience.

HCCs are composed of diverse, and sometimes competitive organizations who, during a disaster, become **interdependent on one another for supplies**, **transportation**, **personnel**, **and more**.

Each HCC must include four core members: acute care hospitals, public health agencies, emergency medical services (EMS), and emergency management agencies.

# NATIONAL PARTICIPATION RATE OF HCC CORE MEMBERS

Acute care hospitals

Public health agencies

Emergency management agencies

Emergency medical services (EMS)

## BY THE NUMBERS

**62** 

Recipients (health departments in states, localities, territories, & freely associated states)

42,128

HCC members nationwide

Validated data as of 6/30/2020

# **Key HCC activities include:**

- ✓ Coordinate joint exercises with HCC members to improve coalition-wide resiliency
- ✓ Coordinate distribution and sharing of medical equipment and supplies during a response
- Develop communications protocols and systems
- ✓ Share real-time information
- ✓ Educate and train health care personnel

## **HCCs IN ACTION**

#### Tennessee

Mobilized cyanide kits from across the state within 6 hours to decontaminate all 88 individuals impacted by a gas leak

#### **North Carolina**

Stood up a state supported shelter to provide continuity of care for 400+ patients displaced during a hurricane

#### Utah

Coordinated over 20 regional trainings to prepare for a burn mass casualty incident

#### **New Mexico**

Partnered with Medical Reserve Corps to provide support to shelters and medical clinics, avoiding a surge of 300-400 emergency room visits from asylum seekers
